What I do?

I design, build and deploy web and mobile applications using the right tools, doing whatever it takes to make the project bring positive results for the stakeholders.

Work

Automaserv LTDA (2017-2018) (Brazil)

Software engineer. I was responsible from the design to the deployment of Web applications and mobile applications, based on desktop systems already created by the company for commercial automation.

Technologies: PHP, Javascript, C#, HTML, CSS, NodeJS, Express.js, MySQL, .NET, Android, Xamarin Android, Xamarin Forms, SVN.

Guipetronix (2018-2019) (Remote)

Full-stack developer. My responsibility is to develop and integrate big applications for startups using different technologies.

Technologies: PHP, Codeigniter, Javascript, NodeJS, VueJS, Vuex, ReactJS, Redux, React Native, HTML, CSS, Express.js, MySQL and Git.

Programming teacher (2016-2017) (Brazil)

I teach programming and other technologies for students in technical high school.

Technologies: PHP, Javascript, HTML, CSS, MySQL, Wordpress, UNIX, Linux, Computer Network, Hardware, Gimp, Inkscape.

Skills

NodeJS, Java, Javascript, C#, ReactJS, VueJS, React Native, MySQL, MongoDB, HTML, Git, Tortoise SVN, Xamarin, Digital Marketing. I'm constant learner. I love to learn new programming languages and other tech skills, and mainly I love to see the how we can arrange little pieces of technology to build something bigger and meaningful.

Education

Bachelor of Science (2013 - 2019) – Computer Engineering

Universidade Federal do Ceará (UFC)

Technical High School (2010 – 2012) - Software Development Technician

Instituto Centro de Ensino Tecnológico (CENTEC)
